

Turn Your Data Into Actionable Growth

MDM Analytics gives you access to market demand profiling, with a clearer view of high-potential targets and accounts by category.

Powerful, Proprietary Data to Drive Your Business Growth

MDM Analytics performs customized searches using filters by product, industry segment, geography, prospects, and customers to gather invaluable market insights. Since 1987, clients have used our data to grow their business and supplement their strategic initiatives in the following ways:

Growth

- Reviewing prospect demand by products to sell into new accounts
- Reviewing customer demand by products to increase share of wallet
- Create smarter prospect lists for sales professionals
- Profiling market demand target marketing support

Expansion

- Reviewing macro level demand trends to identify what industries to sell into
- Reviewing product level demand geographically to consider what new cities/territories to expand into
- Reviewing product level demand geographically to consider what new products to sell

Organization

- Create reports that supplement financial forecasting
- Profiling market demand to supplement M&A Analysis
- Profiling market demand to consider where to invest in a new DC
